Subject: Attorney Privileged, enforcement confidential - Data Evals next steps Mtg w/ Madi & Josie (5/6/22)

---

Caleb and Madi.

Per EPA direction, CDM Smith continues to support analysis and evaluation of the new D/F data collected as part of the 2021 upriver reach field investigation.

It's been since January 26, 2022 that we've confirmed the charge codes for the initial effort and given the evolution of this work effort, I'd like to confirm with EPA our continued work is being placed on the appropriate tasks. Below is a detail of the work effort to-date that shows the Task and brief explanation of the work effort. As you can see, most of the work we are performing involves statistical analysis, so Task 8.2 is where most of our effort is being incurred. A few exceptions exist as noted below.

Please confirm these are the appropriate Tasks for this work. Thanks! Scott
